CloudShell is the leading platform for delivering Infrastructure Automation at Scale for complex on-premise, hybrid, and cloud environments. IT leaders and innovators around the world trust Quali to enable self-service environment provisioning and automated decommissioning to streamline the development, testing, and certification of various technologies into production environments.

PRIVATE + PUBLIC CLOUD

PRIVATE DATACENTER

LAB

- **Continuous Testing**
  Release better quality products faster with fewer escape defects

- **IT Operations**
  Reduce time to fulfill requests for infrastructure

- **Cyber Range**
  Rapidly set up/tear down complex cyber training environments

- **Sales Demos/Virtual POC**
  Accelerate sales and improve training with self-service access to sandbox environments

Replicate and share any environment across teams with simple, one-click deployment

IMPROVE PRODUCTIVITY
Environments On-Demand
Provide your teams with on-demand, self-service access to the standardized environments they need.

AUTOMATE & ORCHESTRATE
Speed Time to Market
Automate the set up of time-bound or persistent sandboxes. If time-bound, CloudShell will automatically tear down the environment freeing up resources for future use.

GOVERNANCE
Gain Full Visibility
Increase visibility and control into data and analytics and view them in an out-of-the-box dashboard.

DEPLOY ELASTIC SANDBOX ENVIRONMENTS IN MINUTES
Deliver full-stack infrastructure environments in a way that's repeatable, reliable, and scalable
Slash your Dev/Test and lab infrastructure cost by **61%**

**Accelerate** your enterprise sales cycles by **22%**

Spin up training and test environments in under **1 minute**
FEATURES

Self-Service Environments

Model complex infrastructure and application environments. Users drag and drop modules to combine physical and virtual infrastructure, network connectivity, applications, and cloud instances.

Simple Blueprint Modeling

Use out-of-the-box automated set-up and tear-down capabilities as well as extensible Python libraries to create powerful orchestration workflows and save & restore environment resources with ease.

Seamless Orchestration

Publish environment blueprints to a shared self-service catalog and provide your teams with on-demand, self-service access to the standardized infrastructure environments they need.

Frictionless Governance

Take control with fine-grained, role-based access, and policy enforcement and support thousands of users with SSO and smart multi-tenancy while controlling costs and security.

Insight Analytics

Gain better insights and optimize your investments by capturing and analyzing user, resource, and reservation statistics all from a single, out-of-the-box Insights Dashboard.

The ability to spin-up sandboxes for Hybrid cloud deployments with standardized environments and end-to-end visibility can allow development and test teams to **make the best use of on premise and public cloud resources, simplify workflows and rollout releases faster with higher quality**
